

Exam : IBM 000-737

**Title : DB2 9 System Administrator
for z/OS Exam**

Version : Demo

Top 3 Customers in Test4pass - Best IT certifications Team

Abbigail, who is proficient in Microsoft technology. After read our Study guides of Microsoft , She think test4pass is the best for IT candidates.

is the best for IT candidates.

Ramsden, who was majored in Manager IT technologys. He has many years of education experience. With his help, many of his candidates have won the certificate. he said:

test4pass' materials are the real one!

The IT experts of American company are training with test4pass braindumps, the manager of the company said: that will help them a lot

by using test4pass.

1. Which two methods can be used to configure the use of a SSL secure port on a DB2 for z/OS server?

(Choose two.)

- A. Specify "Y" in the SECURE column of SYSIBM.SYSLOCATIONS.
- B. Specify a secure port value in the PORT column of SYSIBM.SYSLOCATIONS.
- C. Update the DDF statement in the BSDS using DSNJU003.
- D. Specify the TCP/IP port number in the DRDA SECURE PORT field of the Distributed Data Facility Panel 2 (DSNTIP5).
- E. Specify the value of the secure port in the DRDA PORT field of DSNTIP5.

Answer: CD

2. Non-partitioned table space TS1 lives in database DB1.

Which command removes the intersystem read/write interest against this table space?

- A. -START DB(DB1) SPACE(TS1) ACCESS(FORCE)
- B. -ALTER BUFFERPOOL(*) DBNAME(DB1) SPACE(TS1) MODE(NOISRW)
- C. -START DB(DB1) SPACE(TS1) ACCESS(RW)
- D. -ACCESS DB(DB1) SPACE(TS1) MODE(NGBPDEP)

Answer: D

3. Which single DB2 system parameter must be enabled to allow system level backups to be used for object level recovery?

- A. RESTORE_SYSTEM
- B. RESTORE_RECOVER_FROMDUMP
- C. SYSTEM_LEVEL_BACKUPS
- D. RESTORE_BACKUP

Answer: C

4. An accounting report shows high class 3 times.

Which three could contribute to the class 3 times? (Choose three.)

- A. elapsed time
- B. not accounted time

- C. page latch
- D. service task switch
- E. synchronous I/O

Answer: CDE

5. Which system parameter will lower the DBM1 storage requirements (below the 2 GB bar), if the value was reduced?

- A. MAXDBAT
- B. EDM_SKELETON_POOL
- C. MXDTCACH
- D. MINSTOR

Answer: A

6. Which statement about migrating a DB2 data sharing system to a new DB2 version is correct?

- A. You need to bring down all the members of the DB2 data sharing group except one while running the DB2 CATMAINT utility.
- B. If you use COEXIST=YES, there is no need to run CATMAINT with a single member active. All members can be active during CATMAINT.
- C. You can run CATMAINT with all members of the data sharing group active in DB2.
- D. You can only run the DSNTIJNF job (that switches the system to new-function mode) with a single member active in the DB2 data sharing group.

Answer: C

7. Your administrative scheduler shows message DSNA679I indicating that one or both copies of your task lists is not accessible or is corrupted. Your analysis shows that only the VSAM file is corrupt, but the ADMIN_TASKS table is still operational.

Which statement describes how to correct this situation?

- A. Create an empty version of the VSAM task list and let DB2 perform an autonomic recovery using the content of the ADMIN_TASKS table.
- B. Create an empty version of the VSAM task list and use REPRO utility to copy the contents of the VSAM

cluster containing the ADMIN_TASKS table.

C. Create an empty version of the VSAM task list and use DB2 command -RECOVER TASKLIST to recover the content of the ADMIN_TASKS table.

D. No manual interaction is needed as long as the ADMIN_TASKS table is still accessible.

Answer: A

8. You are migrating your DB2 for z/OS subsystem to version 9 NFM. As part of the migration process, you intend to step through the different IBM provided IVP phases to verify that everything is working well. Looking at the generated jobs, you recognize that there is only one job that has been created for phase 6 (accessing data at a remote site) rather than the whole set of jobs.

What is the reason for this happening?

A. On migration panel DSNTIPR, you have specified YES or AUTO as DDF startup option.

B. On migration panel DSNTIPX, you have not entered a default WLM environment name.

C. On migration panel DSNTIPX, you have entered a default WLM environment, which is not yet defined.

D. On migration panel DSNTIPX, you have not entered a WLM procedure name.

Answer: B

9. After migrating to DB2 9 for z/OS NFM you recognize that you need additional work file database page sets.

Which statement is correct?

A. You must use REXX exec DSNTWFG.

B. Work file database page sets are always user-controlled, that is the associated VSAM clusters must be created prior to the actual creation.

C. Work file database must be stopped in order to add page sets to it using either DSNTWFG exec or CREATE TABLESPACE.

D. You can use either DSNTWFG exec or CREATE TABLESPACE to add additional page sets to the work file database.

Answer: D

10. A DB2 subsystem is being migrated/converted from DB2 Version 8 to DB2 9. The subsystem currently

has these characteristics: new DB2 9 functions are not available; no DB2 9 objects can exist; the subsystem cannot fall-back to CM (conversion mode); the subsystem cannot fall-back to Version 8; the subsystem cannot coexist with any Version 8 systems in a data sharing group.

Which mode describes the DB2 subsystem?

- A. CM* (conversion mode*)
- B. ENFM (enabling-new-function mode)
- C. ENFM* (enabling-new-function mode*)
- D. NFM (new-function mode)

Answer: B
