1. How do you start the application under test?
 - A. use the Windows Start menu
 - B. simply begin recording
 - C. open a command line and start the application by typing its name
 - D. click the Start Application button on the recording toolbar

Answer: D

2. While recording a script, the recording monitor _____.
 - A. appears at the conclusion of recording
 - B. is only displayed on the toolbar
 - C. does not appear
 - D. displays a message for each action

Answer: D

3. What can be tested when recording a verification point?
 - A. an objects data only
 - B. an objects data or properties only
 - C. whether or not the object is working
 - D. an objects data, properties, or existence

Answer: D

4. What can you use to select an object as a verification point?
 - A. the object finder, the object picker, or the object browser
 - B. the main object browser, the test object browser, or the extra object browser
 - C. the object finder, the test object browser, or the delay method
 - D. the delay method, the scripting method, or the pointer method

Answer: C

5. A recording is started by:
 - A. Entering script_record on the command line
 - B. creating a script and then pressing the record button in the RFT application
 - C. starting the application under test
 - D. Starting RFT

Answer: B

6. How do you stop recording?
 - A. click the Stop Recording button on the recording toolbar
 - B. end the application under test
 - C. close RFT
 - D. close the recording monitor

Answer: A

7. Which three actions are possible with RFT? (Choose three.)

- A. use a wizard to substitute literals with datapool variables
- B. substitute literals in verification points with datapool variables
- C. create a datapool while recording a data-driven script
- D. create scripts in c#

Answer: ABC

8. You must _____ a script with a datapool before substituting literal values in the script with references to datapool variables.

- A. share
- B. associate
- C. run
- D. disassociate

Answer: B

9. When is the best time to use data-driven testing?

- A. when the test only needs to be run once
- B. when the test steps change based on the test input data
- C. when the test must be run multiple times with different data
- D. when the test requires a lot of manual data entry

Answer: C

10. Functional Tester allows you to import an external datapool from which of the following ? (Choose three.)

- A. an external .csv file
- B. another Functional Tester datapool
- C. an existing TestManager datapool
- D. an access (.mdb) file

Answer: ABC

11. What will the following CallScript do? CallScript (myScript, null, DP_ALL)

- A. cause the script to run an infinite number of times
- B. cause the script to iterate through the entire datapool
- C. cause the script to run through 100 datapool values
- D. cause myScript to always pass

Answer: B

12. What is one way to insert data-driven commands into the test script?

- A. use the Insert Data Driven Commands button while recording

- B. use the Insert Data Driven Commands button while executing
- C. the commands are generated automatically while importing the datapool
- D. use the super helper class after recording

Answer: A

13. What must you do before editing the datapool using an external application?

- A. make it a public datapool
- B. make it a private datapool
- C. export it to a .csv file
- D. import it from a .csv file

Answer: C

14. Which statement is true about an RFT test datapool?

- A. It is exclusive for only one test script.
- B. It is a collection of related data records.
- C. It is automatically generated during script record.
- D. It is a collection of related test scripts.

Answer: B

15. What must you do to view a comparator of a failed verification point from an RFT text log?

- A. open a web browser and browse to open the file: \<project_path> \<log_name>\<log_vp_name>.rftvd for the verification point you want to view
- B. right-click on the test log and select Failed Verification Points from the right-click menu, then select the verification point you want to view
- C. open the test log, right-click on the verification point line you want to view and select View Results from the right-click menu
- D. log results in another format since you cannot open a comparator from a text log

Answer: B

16. Given an existing TestManager Rational Test project, what are the steps to log results to TestManager?

- A. from TestManager, create a new Test Script Type for RFT, then from RFT, select the Functional Test logging preferences to TestManager
- B. from RFT, select the Functional Test logging preferences to TestManager, then select the TestManager project when you run an RFT test
- C. from RFT, associate the Rational Test Project with the RFT project, then select the Functional Test logging preferences to TestManager
- D. from the Rational Administrator, associate the RFT project to the Rational Test Project, then from RFT, select the Functional Test logging preferences to TestManager

Answer: C

17. Out of the box, what are the different options for logging RFT tests?

- A. HTML, text, custom, TestManager, and none
- B. HTML, text, TPTP, TestManager, and none
- C. TestManager, CQTM, TPTP, HTML, and none
- D. HTML, PDF, text, TestManager, and none

Answer: B

18. Not including TestManager or custom logging, how can you organize RFT test results?

- A. define and follow a naming convention for all test logs
- B. define and follow a naming convention for all logs and log subfolders
- C. create as many folders in the *_logs project as needed and drag logs into the appropriate folders
- D. create additional log projects which are associated with the primary RFT project, (for example, <project>_acceptance_logs)

Answer: A

19. How do you perform image verification in a test?

- A. select Perform Image Verification Point from the Verification Point and Action Wizard
- B. select the Perform Properties Verification Point from the Verification Point and Action Wizard, then select only the .src or other property for the image
- C. download and install the RFT Enhancement Pack plug-in from IBM Rational Support
- D. download and install the Image Comparator for Rational Functional Tester 2003.06 utility from developerWorks

Answer: D

20. What should the tester open to view Test Objects, Main Data Area and Recognition Data?

- A. the test script
- B. the test comparator
- C. the object map
- D. the log viewer

Answer: B
