

**Exam : SUN 310-560**

**Title : Sun Certified Engineer for  
Sun One Directory Server  
5.x**

**Version : Demo**

## Top 3 Customers in Test4pass - Best IT certifications Team

Abbigail, who is proficient in Microsoft technology. After read our Study guides of Microsoft , She think test4pass is the best for IT candidates.

is the best for IT candidates.

Ramsden, who was majored in Manager IT technologys. He has many years of education experience. With his help, many of his candidates have won the certificate. he said:

test4pass' materials are the real one!

The IT experts of American company are training with test4pass braindumps, the manager of the company said: that will help them a lot

by using test4pass.

1. What can be avoided by writing to a primary master server and using a secondary master server for failover?

- A. indexing errors
- B. initialization errors
- C. replication conflicts
- D. low cache hit ratios

**Answer: C**

2. Which three performance measures are important to monitor in a directory environment? (Choose three.)

- A. system status
- B. class of service
- C. database activity
- D. indexing efficiency
- E. schema inheritance

**Answer: ACD**

3. What are two reasons why you would monitor the ns-slapd process? (Choose two.)

- A. to measure write activity
- B. to verify the server process is running
- C. to ensure the process does not get swapped out
- D. to measure Sun ONE Directory Proxy Server performance
- E. to verify that the cluster membership monitor has not restarted it
- F. to verify it does not exceed maximum process size

**Answer: BF**

4. Which file can you examine to determine if there are any unindexed searches?

- A. error log
- B. index log
- C. search log
- D. access log
- E. message log

**Answer: D**

5. Where should you move your custom schema before migration? (Choose two.)

- A. 00core.ldif
- B. slapd.at.conf
- C. slapd.oc.conf
- D. 05rfc2247.ldif
- E. slapd.user\_at.conf

F. slapd.user\_oc.conf

**Answer:** EF

6. Which two statements are true regarding the db2bak command? (Choose two.)

- A. It can back up individual databases.
- B. You can use this command while the server is running.
- C. You can use this command to back up all the databases in your directory.
- D. It backs up the server configuration found directly under the default ./config directory.
- E. You can use this command to back up the data contained by databases on a remote server that you chain to use database links.

**Answer:** BC

7. Which attribute is necessary in entries assigned to a managed role and is not necessary for entries assigned to a filtered role?

- A. cn
- B. ou
- C. nsRole
- D. nsRoleDN
- E. objectclass

**Answer:** D

8. Before deciding to replicate databases, which two tasks should you perform? (Choose two.)

- A. analyze the directory schema
- B. estimate the number of directory entries in each database
- C. estimate the amount of replication traffic that will occur over the network
- D. estimate the query traffic that would occur over the network if you did not replicate databases

**Answer:** CD

9. The operation of the transaction log buffer and physical transaction log on disk depends on the settings of parameters. Which parameter indicates whether database transaction log entries are immediately written to disk?

- A. nsslapd-allidsthreshold
- B. nsslapd-checkpoint-interval
- C. nsslapd-db-checkpoint-interval
- D. nsslapd-db-transaction-logging
- E. nsslapd-db-durable-transactions

**Answer:** E

10. Where is the best place in the schema to define an auxiliary object class?

- A. child of dn

- B. child of top
- C. child of person
- D. child of inetOrgPerson
- E. child of organizationalPerson

**Answer: B**

11. You are trying to make your directory tree more efficient with searches and one of the tasks you are performing is locating searches that referenced unindexed attributes within the access log. What do you look for in the access log?

- A. "BIND" records that have a field note that says "notes=0"
- B. "SRCH" records that have a field note that says "notes=NO"
- C. "INDEX" records that have a field note that says "notes=NO"
- D. "RESULT" records that have a field note that says "notes=U"
- E. "UNBIND" records that have a field note that says "notes=UN"

**Answer: D**

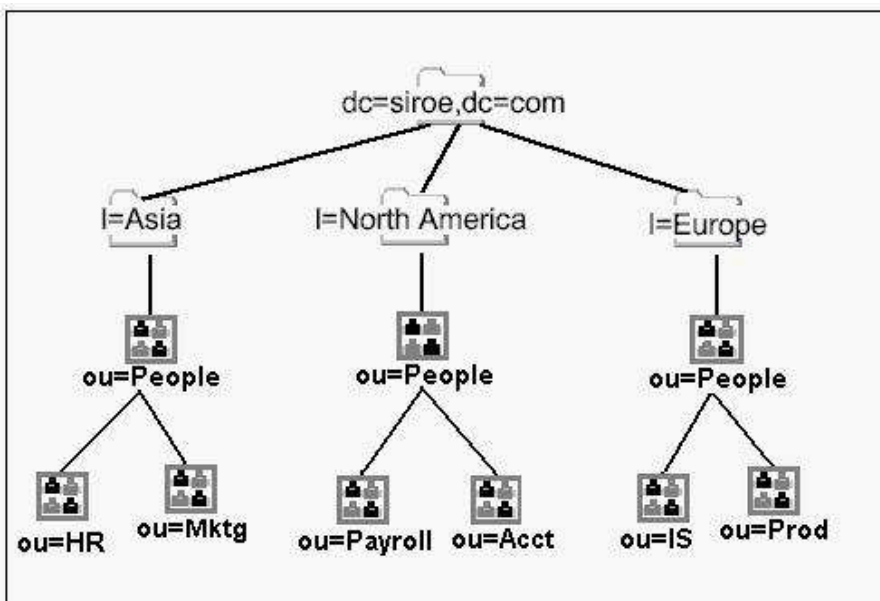

12. Which cipher does the server use if there are no ciphers available on the client?

- A. no encryption, only MD5 message authentication
- B. RC4 cipher with 40-bit encryption and MD5 message authentication
- C. RC2 cipher with 40-bit encryption and MD5 message authentication
- D. Triple DES with 168-bit encryption and SHA message authentication
- E. RC4 cipher with 128-bit encryption and MD5 message authentication

**Answer: A**

13. Click the Exhibit button.

In which three branch points could you create a role so that the entries in the HR branch point can be assigned to them? (Choose three.)

- A. dc=siroe,dc=com
- B. l=Europe,dc=Siroe,dc=com
- C. ou=People,l=Asia,dc=Siroe,dc=com
- D. ou=HR,ou=People,l=Asia,dc=Siroe,dc=com
- E. ou=Mktg,ou=People,l=Asia,dc=Siroe,dc=com

**Answer:** ACD

14. Which two types of data should not be stored in an LDAP directory? (Choose two.)

- A. data that change frequently
- B. data that are written frequently
- C. data that are read often and written infrequently
- D. data that are useful for more than one audience
- E. data that are accessed from more than one physical location

**Answer:** AB

15. You are creating a high availability strategy and are currently looking at the hardware. You want redundancy should a disk fail and you want the best performance available. Which two RAID options best meet your criteria? (Choose two.)

- A. RAID 0
- B. RAID 1
- C. RAID 4
- D. RAID 5
- E. RAID 1+0

**Answer:** DE

16. You want to do a search on all entries that contain the attribute value of Cincinnati, but you are not sure how to spell it. You do a search with the spelling of Cincinatti and you still get the results you need. Which index type was used?

- A. equality
- B. browsing
- C. presence
- D. substring
- E. approximate

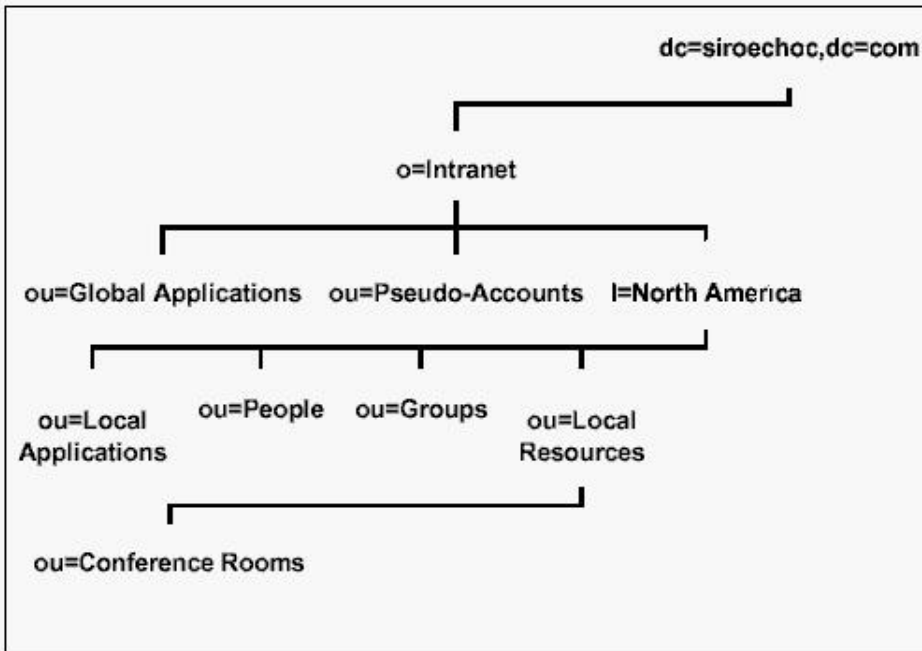

**Answer:** E

17. Click the Exhibit button.

Part of your directory tree is shown in the exhibit. Your tree is currently partitioned at the root suffix. You want to replicate the ou=Conference Rooms, ou=Local Resources, l=North America, o=Intranet, dc=siroechoc,dc=com and the ou=Groups, l=North America, o=Intranet, dc=siroechoc,dc=com branch

points to London.

What additional sub-suffixes need to be created to keep replication traffic at a minimum?

- A. ou=Groups and ou=Local Resources as sub-suffixes
- B. ou=Groups and ou=Conference Rooms as sub-suffixes
- C. l=North America and ou=Pseudo Accounts as sub-suffixes
- D. l=North America and ou=Local Resources as sub-suffixes
- E. ou=Pseudo Accounts and ou=Local Resources as sub-suffixes

**Answer: B**

18. Before mastering directory data in geographically dispersed locations, what must you do first?

- A. identify the bind DN for each user
- B. identify sub-suffixes as databases
- C. identify root suffixes as databases
- D. determine application and data store write requirements

**Answer: D**

19. Which is used to rename an entry within an LDIF file?

- A. changetype: add
- B. changetype: modify
- C. changetype: modrdn
- D. changetype: rename

**Answer: C**

20. Which two statements about ACI statements are true? (Choose two.)

- A. ACIs apply to entries, not attributes.
- B. By default, everything is denied if you have no ACI statements.

- C. ACIs that contain specific rules should be placed at higher levels in the tree.
- D. Default ACIs shipped with Directory Server allow anonymous writes, reads, and searches.
- E. All of the ACI statements encountered from the root entry to the requested resource make up the ACL.

**Answer:** BE

## Contact Test4pass

We are proud of our high-quality customer service, which serves you around the clock 24/7.

**To get your problem resolved instantly, live support**

**Read Our Frequently Asked Questions (FAQs)**

We have gathered the most frequently asked questions for you. Please read our list of FAQs.
