1. You have a new OS design that uses a flash storage device.?

You add the Catalog items for the flash storage device and the file system to the OS design.?

You need to mount the flash storage device as the root of the file system.?

What should you do?

- A. Add the File Cache Manager Catalog item.
- B. Add the File Storage Redirection Catalog item.
- C. Modify the Storage Manager Control Panel Applet.
- D. Modify the Storage Manager profile in the registry.

Answer: D

2. You have an OS design for a target hardware platform that does not use battery-backed RAM. The target hardware has block storage.?

You need to preserve the registry data in a custom location on the block storage device.?

Which should you do?

- A. Add the Hive-based Registry Catalog item and modify platform.bib.
- B. Add the Hive-based Registry Catalog item and modify platform.reg.
- C. Add the RAM-based Registry Catalog item and modify platform.bib.
- D. Add the RAM-based Registry Catalog item and modify platform.reg.

Answer: B

3. You need to extend the functionality of an existing Catalog item. The new functionality must not affect OS designs that already use the Catalog item.?

What should you do first?

- A. Create a copy of the OS design.
- B. Clone the existing Catalog item.
- C. Run the Configuration Manager.
- D. Run the Import and Export Setting Wizard.

Answer: B

4. You have a Windows Embedded CE run-time image for an OS design.?

You need to ensure that third-party developers can develop applications for the OS design.?

What should you provide to the developers?

- A. a board support package (BSP)
- B. a software development kit (SDK)
- C. a Windows CE run-time image
- D. an XML help file

Answer: B

5. You have a Windows Embedded CE run-time image that contains a custom Catalog item.?

You need to verify that the Catalog item's registry keys are in the run-time image before you deploy the image.?

What should you do?

- A. Run Object Browser.
- B. Review Resource View.
- C. Review the reginit.ini file.
- D. Review the project.bib file.

Answer: C

6. You have a Windows Embedded CE run-time image for an OS design.?

You modify the platform.reg file in the board support package (BSP).?

You need to apply the changes to the run-time image.?

What should you do?

- A. Run sysgen_capture.bat.
- B. Run buildrel.bat, and then run makeimg.exe.
- C. Copy platform.reg to the Windows CE client.
- D. Open Remote Registry Editor, and then export the registry key.

Answer: B

7. You have an OS design.?

You attempt to build a Windows Embedded CE run-time image. During the makeimg phase, you receive the following error message: "Error: RAM start overlaps ROM binary."?

You need to ensure that the build process completes successfully.?

What should you do?

- A. Modify the project.reg file of the OS design.
- B. Modify the SOURCES file of the OEM adaptation layer (OAL).
- C. Modify the config.bib file of the board support package (BSP).
- D. Modify the platform.reg file of the board support package (BSP).

Answer: C

8. You have a Windows Embedded CE run-time image.

You do not have the OS design for the run-time image.

You need to identify which Windows CE Catalog items are contained in the run-time image.

What should you do?

- A. Review the contents of the \Windows\ink.exe file.
- B. Review the contents of the \Windows\ceconfig.h file.
- C. From the Remote Tools menu, run Remote Registry Editor.
- D. From the Remote Tools menu, run Remote System Information.

Answer: B

9. You build a Windows Embedded CE run-time image.

You need to download the run-time image from Windows CE Platform Builder to the built-in device emulator.

You must achieve this goal without modifying the emulator.

What are two possible ways to download the run-time image? (Each correct answer presents a complete solution. Choose two.)

- A. Use USB.
- B. Use DMA.
- C. Use Serial.
- D. Use Ethernet.

Answer: B AND D

10. You need to measure the interrupt service thread (IST) latency for a target hardware platform.

What should you do?

- A. Enable and run iltiming.exe.
- B. Call the GetTickCount function.
- C. Call the QueryPerformanceCounter function.
- D. From the Remote Tools menu, run Remote Process Viewer.

Answer: A
